

ELECTRIC PULLER**DP-40E ELECTRIC PULLER**

- **Extremely quiet in operation**
- **Zero carbon emissions**

The TIMBERLAND Model DP-40E is a heavy duty drum electric puller designed for light transmission and distribution line stringing. The reel drive incorporates a "NEW" electrical drive that allows the operator to infinitely vary the linespeed and linepull for safe, positive control during the pulling operation. The maximum desired linepull can be preset prior to pulling so that the reel drive will stall if a restriction to the line occurs avoiding damage to the conductor, towers and hardware. The central operator's console allows the operator to completely control the pulling operation with optimum visibility of the pulling rope. Operator controls include linepull, linespeed, holding brake and levelwind.

Continuous Torque Rating 66,750 in-lbs
Continuous Linepull Rating 4,000 lbs
(with 6,000 ft of 5/8" rope on the drum)
0-5 mph linespeed with infinite control

STANDARD FEATURES

- Electric pulling system (Patent Pending)
- Reel capacity up to 72" diameter, 56" wide and 6,000 lbs
- Tandem axle with leaf spring suspension
- Infinitely variable linespeed and linepull control
- Free wheeling disconnect for high speed rope pull out
- Central operator's position for maximum safety and visibility
- Operator's seat with horizontal and vertical adjustments
- Quick change reel shaft with straight vertical lift
- Engraved operator's console

OPTIONAL EQUIPMENT

- Bronze over-spin pay-out brake (mechanical)
- Electric overhead levelwind
- Combination overhead/underground levelwind
- Mechanical drop-leg rear jacks
