

**ACCESSORIES**

The "Conductempor" is constructed of the finest materials and contains a highly accurate bimetal thermometer to determine the temperature of the conductor and not just the air. With quick accurate response to temperature variations, it may be used for any size aluminum conductor.

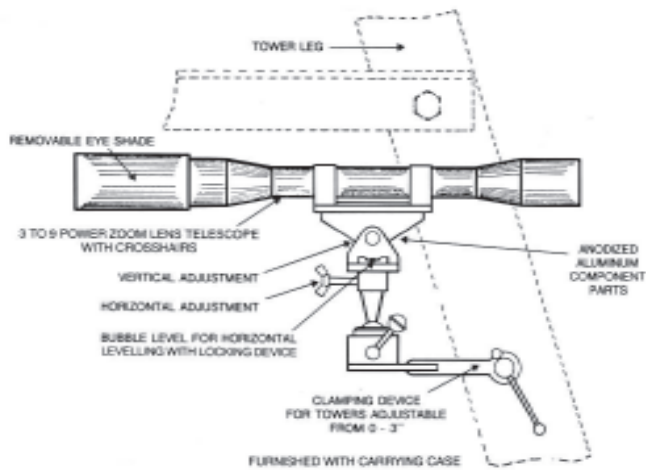

It has a large 1-3/4" inch dial graduated in 2 degree increments for ease of reading with dual Fahrenheit and Centigrade scales.

Part Number: 537145

**Variable Sag-Scope**

Primarily used to sag single conductor.  
A simple and inexpensive device for accurate conductor sagging.  
Easily adjustable clamp for quick set-up.

Part Number: 536347
